8.26.1. Libxcrypt

Libxcrypt   .

```
./configure --prefix=/usr                 \
            --enable-hashes=strong,glibc \
            --enable-obsolete-api=no     \
            --disable-static             \
            --disable-failure-tokens
```

configure

- *–enable-hashes=strong,glibc*

                                                                    Glibc libcrypt
                    .
- *–enable-obsolete-api=no*
                          API   .   Linux
                    .
- *–disable-failure-tokens*

                                  .
              Glibc   Linux   .

                    .

```
make
```

```
make check
```

.

```
make install
```

API   .
                                              ABI   1   .
                              LSB
                                                .

```
make distclean
./configure --prefix=/usr                \
            --enable-hashes=strong,glibc \
            --enable-obsolete-api=glibc  \
            --disable-static             \
            --disable-failure-tokens
make
cp -av --remove-destination .libs/libcrypt.so.1* /usr/lib
```
