Autoconf-archive

설치

Gnulib가 없으면 설치

```
git clone https://git.savannah.gnu.org/git/gnulib.git      &&  
ln -sv $(realpath gnulib/gnulib-tool) /usr/bin/           &&
```

Autoconf-archive 설치

```
git clone https://github.com/autoconf-archive/autoconf-archive.git &&  
cd autoconf-archive                                             &&  
./bootstrap.sh                                                  &&  
./configure --prefix=/usr                                       &&  
make maintainer-all                                           &&  
make                                                            &&  
sudo make install
```
