

CUnit 2.1-3

<https://cunit.sourceforge.net/>

CUnit is a lightweight system for writing, administering, and running unit tests in C. It provides C programmers a basic testing functionality with a flexible variety of user interfaces.

```
./bootstrap
./configure --prefix=/usr --sysconfdir=/usr --
docdir=/usr/share/doc/CUnit-2.1-3 --disable-static --enable-test
make
sudo make install
```
